## ECOFFINS

100% Natural and biodegradable products made in China, Poland and England from materials grown and cropped in licensed and Fair Trade plantations. Willow is a fast-growing, perennial, highly sustainable and renewable material which can be annually harvested and will immediately begin regrowing without new tilling and planting. Willow's fast regrowth keeps pace with the rate of harvesting, unlike the trees used in traditional coffin manufacturing which are cut down at a faster rate than they can regrow.
